## Personal Profile:

I am a highly motivated graduate, passionate about technology and coding. I have good critical and logical decision-making skills, particularly evidenced in the final year professional project I completed for my degree where I successfully developed an educational piece of software using the Godot engine and GDScript. I am self-motivated, enjoy the challenge and thrive working in fast-paced environments where projects are evolving and developing constantly, and I have developed my resilience output speed by taking part in game jams. I have also worked on many personal projects, including building apps using Go, Java, HTML, CSS and JavaScript, SQL, PHP. I am now looking to begin my professional career with a company that I can grow with.

## Key Skills:

- **Technologies:** Experience and expertise in Excel, Xero, WordPress, Java, Python, Git, CI/CD, React, HTML5, CSS, Agile Methodologies, SQL, TypeScript, Windows, MacOS, Linux.
- **Communication:** Developed outstanding communication skills both within a team and interpersonal context when working with clients.
- **Wholistic:** I have developed a thorough and widespread approach to my work, ensuring that all details are attended to along with a desire to continue my self-development.
- **Team Player:** I thrive in working as a member of a team during long-term projects as evidenced in my final year module where I developed a small application in co-operation with my peers and tutor feedback. I enjoy supporting my colleagues to ensure their success.
- **Self-Starter:** I am a self-driven individual who prioritizes the growth mindset that is necessary for a career as a professional. I am always looking to widen my skillset as evidenced in my pursuit of a master's degree in computer science.
